

Equipment Rental

Giving you more options

Renting is not just for a temporary situation. For many, the advantage of being able to 'try before you buy' can be a key factor in deciding on the most suitable equipment for your needs.

Ask one of our customer service representatives about all of our rental equipment options today.

For many people, renting is the S.M.A.R.T. option:

- S** Set up a safer environment
- M** Manage your recovery
- A** Available just when you need it
- R** Rent before you decide to buy
- T** Take advantage of affordable rates

Your Shoppers Home Health Care Representative:

Just when you need it, for as long as you need it

At Shoppers Home Health Care, we know that you do not always need a long-term solution for a temporary health care problem. For someone recovering from surgery or an injury, or for house guests that may require a little extra help managing their safety but cannot travel with the items they need, why not consider renting?

For those products that you may need to adapt to a temporary situation we have created Canada's most comprehensive equipment rental program, available through all of our stores. Many of the most popular products that you can buy in our stores can also be rented for as long as you need them, providing a simple, convenient and affordable solution to managing short term challenges in your day-to-day life.

Bring safety home

Renting allows you to set up a temporary, safer environment in your home without the need to make any permanent renovations. All equipment is thoroughly inspected, so you know you will always receive the safest, most reliable equipment available.

We have everything you need

From canes, crutches and wheelchairs, to bathroom safety products and even stair lifts, you can rent what you need, just when you need it, for as long as you need it.

You can choose to visit your local Shoppers Home Health Care store to pick up any items you may need or have them delivered directly to your home by one of our many professional installers. We make sure that everything is set up correctly in your home and provide full instructions for safe usage while you are renting.
