Helping You Get Back in the Game

It's no secret that Canadians love sports – however, sports don't always love us back. At any age, and especially as you get older, your love of sport might not change, but the hits and falls that you used to just shake off can start to take longer to recover from. At some point, you may find yourself needing a little extra help dealing with an injury.

That is where your local Shoppers Home Health Care store comes in. From aches, pains and strains after that weekend hockey game, to more serious injuries that might keep you on the bench for a little longer, Shoppers Home Health Care is the store that Canadians trust to help them get back in the game.

We carry the largest available selection of supports and braces to help with almost any injury, with specially trained staff to make sure you are getting the right product with the best possible fit.

Supports & Braces

Depending on the nature of your injury, the right support or brace can make a world of difference to your recovery. They can provide therapeutic heat, physical restraint and support, along with the comfort, support and re-assurance you need while you work on getting back into shape.

Wherever you take the hit, whether it is your knee, ankle, back, shoulder, elbow, wrist, thumb, groin, thigh or calf, we have a full range of products that are tailored to each specific area.

It is the role of our trained fitters to assess each injury and recommend and fit the best choice of product for your needs, often as prescribed by your family doctor or other healthcare professional.

Highly Trained Staff

The difference at Shoppers Home Health Care is our friendly and highly trained staff, including certified fitters who can help identify and fit the best support or brace to help you deal with your injury.

Everyday Injuries

Not every injury that can benefit from the correct brace is the result of a mishap on the playing field. One wrong move, a heavy object lifted badly or an uncomfortable, repetitive task can bring on real and lasting pain and discomfort.

More often these days, Tennis Elbow can affect people who have never picked up a racket in their life. Repetitive Strain Injuries, Carpal Tunnel Syndrome and Tendonitis are all serious, everyday conditions for which a correctly fitted brace can help alleviate your pain and speed recovery.

Rental Equipment

With any short-term injury there are adjustments that need to be made to your everyday routine. Basic activities such as bathing or just getting around can become major challenges.

At Shoppers Home Health Care we know that you do not always need a permanent solution for a temporary problem, so we also offer many of the items we sell for rental. From canes and crutches to bathtub safety handles and seats, you can rent almost anything you might need to stay active and make life easier while you are recovering.

Ask one of our certified fitters or customer service representatives about rental equipment options today.
